Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 May 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This Office Action is in response to the amendment filed May 26, 2010 for the above identified patent application.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith et al. (USP 5,863,132).

Referring to Figure 8, Smith et al. teaches a bearing comprising a frame (133,141,142,143) at least partly surrounding two matrices each of a plurality of spheres (12,14), each matrix when flat having its spheres mounted for rotation in at least part a single plane, the plane of one matrix being parallel to that of the other matrix, each sphere of one matrix contiguous with a plurality of spheres of the other matrix so that rotation of a sphere of one matrix results in counter rotation of a plurality of spheres of the other matrix, wherein the spheres of each matrix project beyond the frame and are retained in the same position relative to the frame during rotation.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 5, 13, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al. (USP 5,863,132).

With respect to claims 2, 5, 13, and 14, the prior art to Smith et al. does not disclose the balls having the claimed diameter. It would have been within the skill of one in the art at the time the invention was made to modify the size of the balls disclosed by Smith et al. with balls having a diameter, for example, of 7.5mm or 15mm, motivation being to provide the bearing device with a predetermined operating capacity.

With respect to claims 7 and 15, Smith et al. illustrates the ball matrix extending along a flat plane. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the ball matrix of Smith et al. with a curved shape, motivation being to support a machine element having a curved surface.

Allowable Subject Matter

5. Claims 3-4, 6, 8-10, and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the bearing device of US Patent 4,297,913.
